Professional Profile

- I have been learning and working on front-end for almost 4 years. I learnt necessary skills and practiced by designing, creating different web-templates, competing with other developers and so on. I have done some courses too: “Najot Ta’lim” front-end course, FreeCodeCamp, HTML Academy, Wes Bos, Traversy Media, Mosh, Udemy and other online video courses. I have designed and created a lot of front-end templates with what I know and also learnt new skills, web-technologies, useful tricks while creating them.

Skills

I know:

- HTML
- CSS
- Sass
- Bootstrap
- JavaScript (ES5, ES6)
- jQuery
- React
- Photoshop

I am also familiar with:

- C++
- PHP
- Python
- Linux distributions, like Ubuntu, Mint and Deepin

Education

2017 – Present **Bachelor’s Degree**

Tashkent University of Information technologies – Software Engineering Faculty

Work Experience

- I have taught English to a lot of students while I was at college and at university.
- In 2019 I participated in Telegram's Instant View Competition and I have earned 1500$. Here are the stats: https://instantview.telegram.org/contest/winners2019
- I also tried to work online as a freelancer in Upwork and Fiverr.
